

# FREE TRAINING SEMINARS

## LIME IN BUILDING

Traditional buildings often used lime in their construction and finishes; Lime is an appropriate and very effective building material, with a long history of use. It comes in a range of strengths and types, suitable for use in a wide range of situations.

As the longest established manufacturer/supplier in the region with a proven track record in building conservation, the Cornish Lime Co have an intimate craft understanding of old buildings and the materials marketed by them for use repairing them, and the advantages they often offer in comparison to their modern equivalents.

Following the introduction of our new purpose built training centre Cornish Lime is offering **free CPD** sessions. Yes we are a commercial enterprise, and we have to promote our products, but these events are not commercially slanted (we believe the materials can sell themselves), what's important to us is that we share our knowledge and information as widely as possible, along with anything else we can do to preserve the regions built heritage and prevent the decline in craft skills the industry has suffered in recent years.

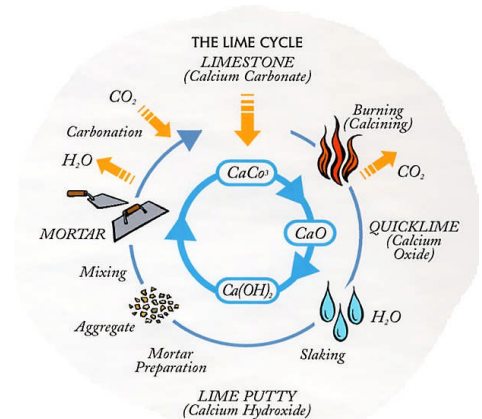

The sessions can follow a prearranged format prepared by us, or bespoke to suit the requirements of your practice. Conducted in a purpose built classroom complete with modern audio visual equipment, and a practical training room where craft skills and materials can be demonstrated if appropriate.

Our aim is to make the sessions informative, worthwhile and hopefully enjoyable, for what we hope will be a mutually beneficial arrangement for all concerned.

## SOME OF THE SUBJECTS COVERED

- The History of Lime in Building.
- Types of Lime Non Hydraulic (Putty) & Hydraulic Lime.
- Where & When to Use Them.
- Rendering, Plastering & surface finishes.
- Sands & their importance.
- Appropriate Decoration.
- Beck Mineral Paints. AGLAIA Natural Paints.

The content of these seminars is fairly general but wherever possible we would be willing to accommodate bespoke sessions to suit your own requirements. Should any of the above be of interest or you would simply like additional information, or to discuss the matter please don't hesitate to contact me, Phil Brown on 01208 79779, Mobile 07966 198401 or email [phil@cornishlime.co.uk](mailto:phil@cornishlime.co.uk).

*Cornish Lime are the regional distributor for St.Astier Natural Hydraulic Limes, Beecks Mineral Paints and AGLAIA Natural Paints; an extensive range of products for Conservation & Ecological building.*

## Cornish Lime Company - CPD Seminars

We don't profess to be able to teach you all there is to know about lime in a two hour seminar, but using our experience we can hopefully help to clarify it's use and demonstrate it's suitability to a wide range of applications and help to avoid some of the pitfalls when specifying it's use.

The session is presented by Phil Brown, the owner of Cornish Lime and founder of Darrock & Brown Building Conservation, where up until five years ago he owned and managed the company. Phil comes from a trade background and brings a wealth of experience to his presentations gained from working on and supplying many of the regions finest buildings.

We aim to reward your time in attending such an event with a worthwhile and meaningful presentation that is less about Cornish Lime and more about the philosophy and suitability of the materials we promote and how they can help you and your clients.

Time	Seminar Content
3.15	"Muster" & Coffee
3.30	Power Point presentation; Lime In Building: History, Types of Lime (hydraulic or non-hydraulic), When, Where, & Why, Specifying their use, Mixes, The Importance of Sands, Health & Safety Etc.
